EAST OAK

EAST OAK 36" Fire Pit Mat

INTRODUCTION

Thank you for trusting us and welcome to the East Oak family!

Whether you're camping during the peak of summer, barbecuing steaks with the bros, or even welding a new bumper for your truck, our protective fire pit mat is made to keep everyone safe no matter what you're doing.

It's designed with woven fabric and is three times as thick as your average mat. This means that we promise heat resistance up to 1000 degrees Fahrenheit. And in cases of fires, our flame retardant grade is UL 94-v0, which ensures rapid relief in less than 30 seconds. We create each fire pit mat with premium diameter fiberglass and double silicone coating, which makes it easy to clean after use.

FIRE PREVENTION IS KEY

Our mats are designed with premium fire-resistant materials that ensure quick response in case a fire does break out.

SIZING

Our fire mat is 36 inches in diameter and weighs 1 lb. When folded, it is 9.7x9.7x1 inches, which fits easily into most trunks and sheds.

Plus, it's hypoallergenic – made with silicone coated fiberglass – so it's safe to handle and itch-free.

BEST PRACTICES

To ensure optimal safety, we recommend at least 5.9 inches in distance between the mat and the heat source. It can be used on top of grass, wood, tile, or garage flooring. To clean, wipe the surface with a wet cloth before storing.

⚠ WARNING

1. Do not place the heat source directly on top of the fire mat.
2. Make sure there is at least 5.9 inches between the heat source and the mat for adequate heat protection.
3. Do not use a heat source higher than 1000 degrees F.

QUESTIONS/CONCERNS

Your satisfaction is important to us. If you have any questions or concerns regarding the quality of your fire mat, please feel free to let us know and our team will reply within 24 hours.
